30 minutes from shanghai by Air
3 hours from Hangzhou by bullet train
2 hours from Ningbo by bullet train

浙江正昌锻造股份有限公司

ZHEJIANG ZHENGCHANG FORGING CO.,LTD

ISO:14001
ISO/TS:16949

Basic Information

Location: Rui`an, China
Founded: 1988
Registration capital: 20 million RMB
Employee: 500 people
Landing: 50000 m²
Product: auto parts, electric parts
Process: Forging, Machining
Output: Forging 18000 Tons
Machined 5million pcs

QMS: ISO/TS:16949
EMS: ISO:14001
Market: Automotive industry
Electric industry

附录 A

版本/修改: B/0

浙江正昌锻造股份有限公司

ZHEJIANG ZHENGCHANG FORGING CO.,LTD

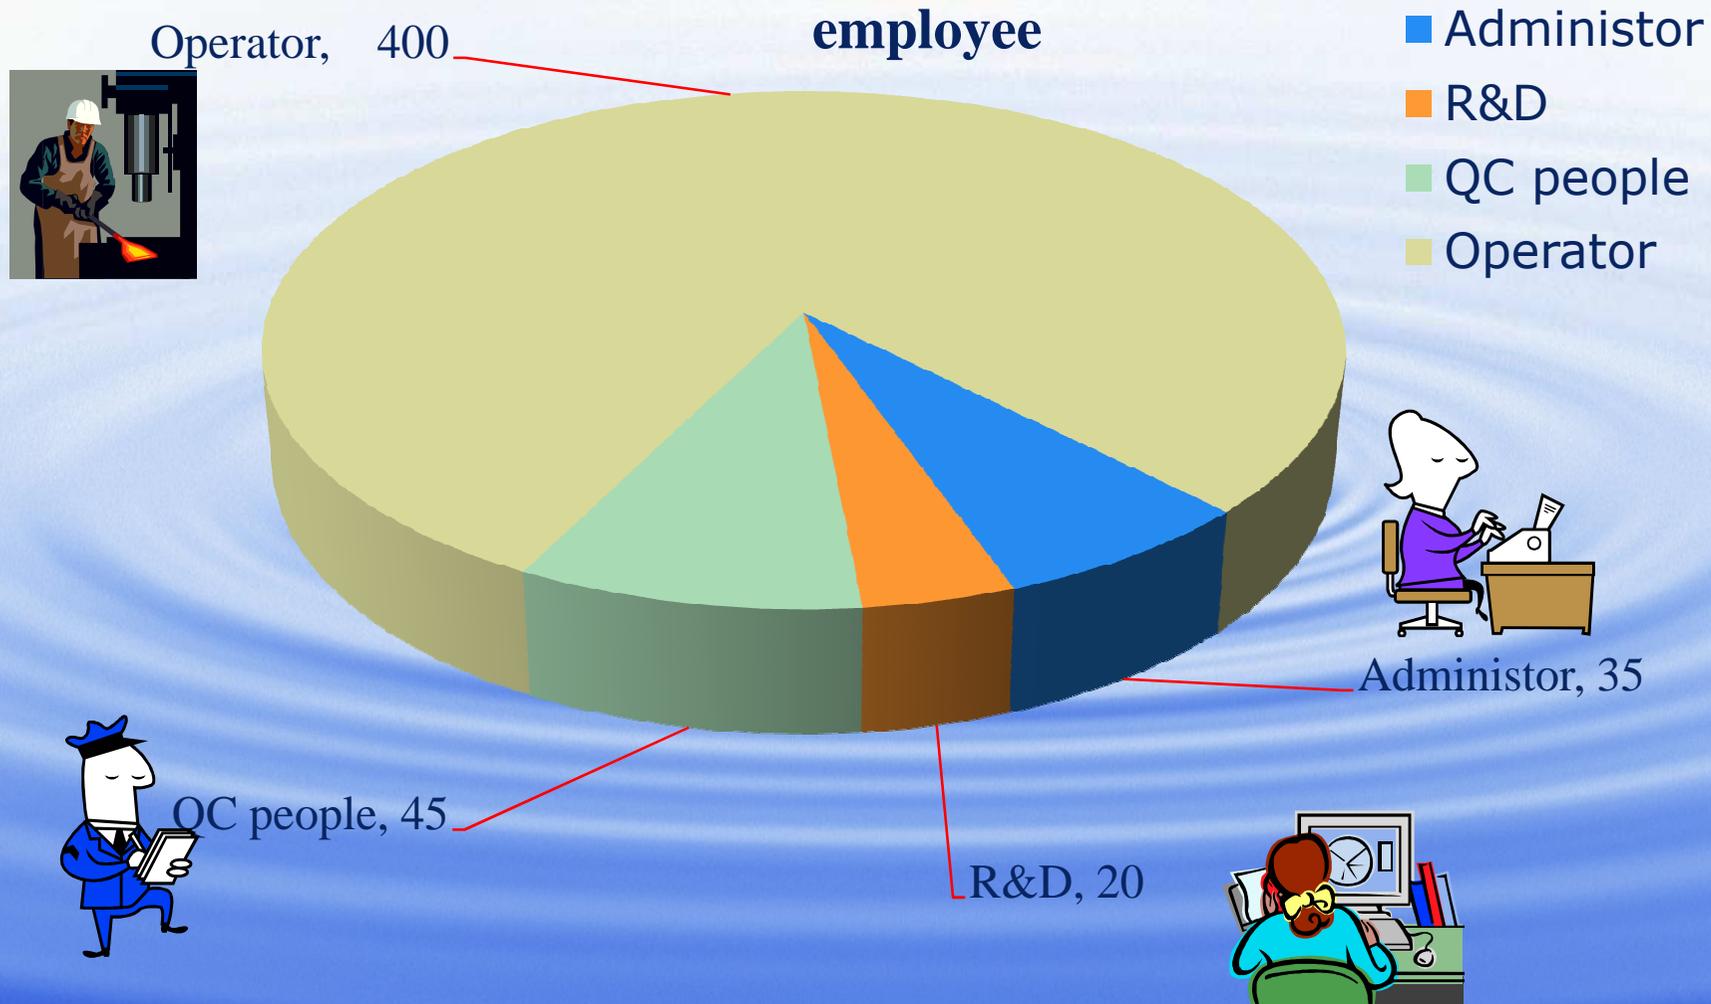

ISO:14001
ISO/TS:16949

Development history

- 1988, establishment of Rui`an Qianjin Forging factory
- 1995, supplier to Shanghai Gear General Factory
- 1998, establishment of Rui`an Zhengchang Forging Co.,ltd
- 2000, supplier to Eaton truck parts (shanghai) 。
Applied ISO:9001 Quality management system
- 2002, T2 supplier to China First Auto Workshop. (FAW Changchun)
- 2003, supplier the largest heavy duty truck Gearbox manufacturer—
Shanxi Fast Gear group and
World 500,Electric Giant—Schneider Electric.
- 2006, supplier to Great wall motor—the first Chinese auto company
who successfully sell autos to Europe market.
- 2006, T2 supplier to Beijing HYUNDAI.
- 2007, Applied ISO/TS:16949 quality management system.
- 2008, Applied ISO:14001 Environmental Protection system
- 2009, supplier to the most fast growing autos company--BYD motors.
- 2010, supplier to Hangzhou HAVECO Automotive Transmission Co., Ltd
supplier to Vibracoustic (Yantai)
- 2011,supplier to SANY Group

制造设备 Equipment

New factory in Rui'an economic development zone

发展规划 Investment plan

我司二期厂房已经进入工程设计阶段，建成后的新厂房位于市经济开发区阁巷新区15号，占地35亩，集研发、生产、销售于一体。计划投入2.2亿元人民币，引进世界先进的自动化生产和检测设备，主要生产汽车配件、火车机车配件、矿山机械、有色金属等系列产品，专门为汽车主机厂及输配电行业配套。从原材料进厂到成品，工艺设计引进三维有限元锻造分析，整个生产过程采用计算机条形码管理和生产信息化管理，打造国内一流的锻造、热处理及机加工生产企业。目前，厂房已经进入设计评审阶段，整个进程正按计划时间顺利进行，预计两年后可投入生产。

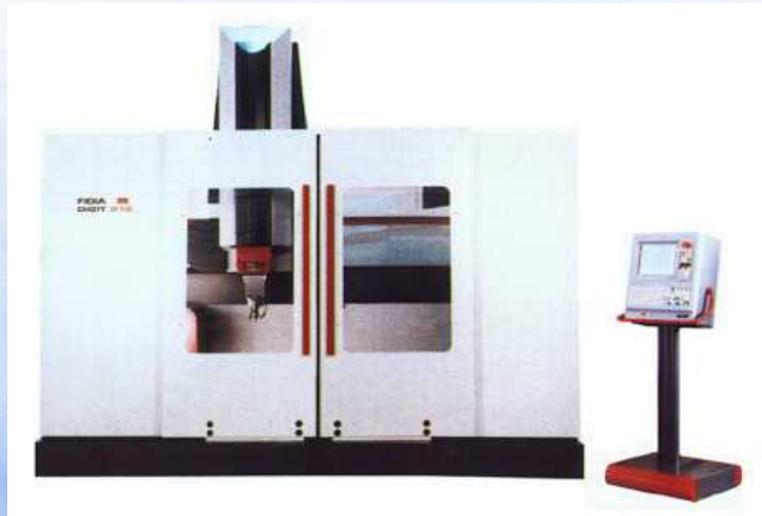

- ❖ The second factory of Zhengchang is located at Rui'an Economical development zone, about 20 minutes` driving away from current factory. The total landing area of the new factory is about 24,000.0 m² with a investment proximately about 220 millions RMB. Facilitated by advanced automatic manufacturing and inspection equipment, the new factory will continually focused on auto industry, railway industry and non-ferrous metal parts industry, Provide OEM service for local Chinese big OEMS and oversea market. Bar code system and information management system will be applied through the whole manufacturing process from raw material, forging to finished parts. Three-dimensional finite element method will introduced for the forging design process. The final mission is to establish an advanced, first-class, modern production lines combined with forging, machining, heat treatment.

The new factory currently is under designing process and will be put into use in two years according to the project schedule.

New equipment plan for tool

Plan:

End of 2011

1.High speed milling center

**2.NC Electric sparking machining
equipment**
